

We hope these videos inspire you to play scientist at home! Grown-up approval, of course. Here are the ingredients we used throughout our four week STEM adventure, along with other helpful hints. You will also need mixing supplies, such as: spoons, cups, bowls, or jars.

- Food coloring
- Baking soda
- Vinegar
- Vegetable oil
- Antacid tablets
- Peroxide
- Dry yeast
- Dish soap
- Red cabbage
- Water

- ▶ For video three you will need samples to test with your pH indicator. In addition to items on this list we used lemon juice and cola.
